

# Digital Science Activities: Quick Start Guide

1. Log into your account. If you do not have an account, register now.
2. Once signed in select the Digital Activities tab.
3. Digital Activities are organized based on the grade level and curriculum. Select the grade you are looking for and click on the title of the digital activity.
4. If you are interested in this digital activity click on the "Download PC" or "Download Mac" button.
5. If you haven't signed into your account yet, you will be prompted to do so. The download will begin automatically, when prompted choose save file.
6. You will be provided a username and password for the digital activity you downloaded. You will need this information when you start the digital activity. You may write down this information, email it to yourself, or you can access this information from the my account tab.
7. Once the file is downloaded, unzip the file and double click to begin.
8. You will be prompted to enter your digital activity username and password. This is required to use the digital activity. Each digital activity is available for a limited time.
9. Following registration your class can start to use the digital activity.
10. The students results will be collected and can be accessed on the online booking site at <http://bookings.sciencealberta.org> . When you are logged in, click on "my account" you will find the "digital activity" tab. This shows you all the activities you have downloaded, username, password and expiry date for each as well as a link to the student results.
11. Click on the student results link to find which students have completed the digital science activity and how they have performed on the quiz and challenge.
12. If you like the digital activity and would like to use it in the next school year, please check back to the Educator Resource Centre in the fall!
